Firehouse Coffee Company was established by a Western Washington Local 2105 Professional Firefighter, family, and friends. We are located in the City of Tacoma in the beautiful Puget Sound region, one hour south of Seattle.

Our family's interest and livelihood in the coffee industry began over a hundred years ago in Central America. By visiting coffee farms in Central America, we learned what our family and many farmers today endure to survive and provide for their families. As a result, we are committed to supporting certified Fair Trade and Organic coffee farms. These sustainable coffee farms and co-ops meet stringent guidelines that improve environmental, social, and economic standards within their region.

Firehouse Coffee Company is a true specialty coffee roaster. We take pride in custom roasting our coffees to highlight each origin's unique characteristic. Our superior craftsmanship is committed to maintaining a consistent level of quality. When you purchase and enjoy these wonderful tasting coffees, you experience our passion, dedication, and tradition. You also feel good knowing that you are actively contributing and making a difference in the lives of farmers and families all over the world.
